

<b>Year 5</b> <b>Computing</b> <b>Autumn 1</b> <b>Computing systems and networks: Search engines</b>	
<b>Previous learning</b>	
<p>Before starting this unit, you might want to check that children can recall:</p> <ul style="list-style-type: none"> <li>-A network is more than one electronic device connected through the internet or a local connection to share files and information.</li> <li>-The internet is a worldwide network that enables tens of millions of computers around the globe to share information and allows users to communicate with each other.</li> <li>-You should tell a trusted adult if you feel unsafe or worried online.</li> </ul>	
<b>Substantive Knowledge in Computing</b>	<b>Disciplinary knowledge in Computing</b>
<p>By the end of KS2, children will know how different technology is used in our lives; they will have developed knowledge of Digital Literacy; they will understand the basic principles of programming and coding and they will know how to stay safe using the internet.</p>	<p>Our Computing curriculum will equip children not only with the skills and knowledge to learn and grow in the digital world we live in, but more importantly in a safe and secure manner. They will be able to apply the British Values of democracy, tolerance, mutual respect, rule of law and liberty when using digital systems.</p>
<b>Lesson 1</b>	<b>Searching basics</b>
	<p>To understand what a search engine is and how to use it.</p> <p>I can explain what a search engine is.  I can use a search engine to navigate the web.  I can suggest keywords for searching.</p>
<b>Lesson 2</b>	<b>Inaccurate information</b>
	<p>To be aware that not everything online is true.</p> <p>I can recognise that not everything online is true.  I can understand anyone can create a website.  I can suggest ways of checking validity.</p>
<b>Lesson 3</b>	<b>Web quest</b>
	<p>To search effectively.</p> <p>I can understand the importance of keywords.  I can use the acronym TASK.  I can use my search skills to answer focused questions.</p>
<b>Lesson 4</b>	<b>Information poster</b>
	<p>To create an informative poster.</p> <p>I can include a title and at least five facts.  I can choose appropriate pictures, colours and designs.  I can consider fair use.  I can credit people for information, images and videos I use.</p>
<b>Lesson 5</b>	<b>Web crawlers</b>
	<p>To understand how search engines work.</p> <p>I can understand the role of a web index.</p>

	I can explain what web crawlers are. I can discuss page rank.
<b>Vocabulary</b>	
data leak, data privacy, network, online, search engine, Website, correct, deceive, fake news, inaccurate information, keywords, TASK, copyright, credit, fair, inappropriate	

<b>Year 5</b> <b>Computing</b> <b>Autumn 2</b> <b>Programming 1: Music</b>	
<b>Previous learning</b>	
<p>Before starting this unit, you might want to check that children can recall:</p> <p>Scratch is a programming language.          What a loop is and how it improves programming.          Decomposition means to break a problem down into smaller chunks.          Remixing is when existing code is adapted to create something new.</p>	
<b>Substantive Knowledge in Computing</b>	<b>Disciplinary knowledge in Computing</b>
By the end of KS2, children will know how different technology is used in our lives; they will have developed knowledge of Digital Literacy; they will understand the basic principles of programming and coding and they will know how to stay safe using the internet.	Our Computing curriculum will equip children not only with the skills and knowledge to learn and grow in the digital world we live in, but more importantly in a safe and secure manner. They will be able to apply the British Values of democracy, tolerance, mutual respect, rule of law and liberty when using digital systems.
<b>Lesson 1</b>	<b>Tinkering with Scratch music elements</b>
	<p>To tinker with Scratch music elements.</p> <p>I can identify that Scratch is a coding application with music elements.          I can predict what I think different code blocks will do.          I can explore Scratch independently.          I can explain what I found from tinkering.</p>
<b>Lesson 2</b>	<b>Scratch soundtracks</b>
	<p>To create a program that plays themed music.</p> <p>I can use Scratch's basic sound commands.          I can include a loop in my program.          I can debug simple errors in my code.</p>
<b>Lesson 3</b>	<b>Planning a soundtrack</b>
	<p>To plan a soundtrack program.</p> <p>I can decompose a story.          I can plan my program by tinkering.          I can explain how my program will add to the story.</p>
<b>Lesson 4</b>	<b>Programming a soundtrack</b>
	<p>To program a soundtrack.</p> <p>I can work from a plan.          I can use a range of programming commands.          I can explain how my program enhances the scene.</p>

<b>Lesson 5</b>	<b>Battle of the bands</b>
	<p>To program music for a specific purpose.</p> <p>I can combine known commands.  I can code music with a purpose.  I can use repetition in a program.  I can use various forms of output [sound].</p>
<b>Vocabulary</b>	
basic command, tinkering, debug, code, loop, pitch, program, rhythm, tempo, timbre, decompose, pitch, rhythm, soundtrack, repeat, output	

<b>Year 5</b> <b>Computing</b> <b>Spring 1</b> <b>Data handling: Mars Rover 1</b>	
<b>Previous learning</b>	
<p>Before starting this unit you might want to check children can recall:</p> <p>What a branching database is.  Filtering data shows only selected data.  Logging information means recording data.</p>	
<b>Substantive Knowledge in Computing</b>	<b>Disciplinary knowledge in Computing</b>
By the end of KS2, children will know how different technology is used in our lives; they will have developed knowledge of Digital Literacy; they will understand the basic principles of programming and coding and they will know how to stay safe using the internet.	Our Computing curriculum will equip children not only with the skills and knowledge to learn and grow in the digital world we live in, but more importantly in a safe and secure manner. They will be able to apply the British Values of democracy, tolerance, mutual respect, rule of law and liberty when using digital systems.
<b>Lesson 1</b>	<b>Mars Rover</b>
	<p>To identify how and why data is collected from space.</p> <p>I can recall the meanings of 'data' and 'transmit'.  I can identify a type of data that the Mars Rover may transmit back to Earth.  I can identify the challenges of transmitting data over large distances.  I can explain why data is being collected from the Mars Rover.</p>
<b>Lesson 2</b>	<b>Binary code</b>
	<p>To read and calculate numbers using binary code.</p> <p>I can identify binary as the most basic way that computers communicate.  I can read binary numbers up to eight characters.  I can recall that each number (one or zero) is referred to as a bit.  I can calculate binary numbers, knowing each digit is worth double the one that precedes it.</p>
<b>Lesson 3</b>	<b>Computer architecture</b>
	<p>To identify the computer architecture of the Mars Rovers.</p> <p>I can identify sensors.  I can identify the difference between computer input and output.  I can explain how the size of random-access memory (RAM) affects the processing of data (CPU).</p>
<b>Lesson 4</b>	<b>Using binary - numbers</b>

	<p>To use simple operations to calculate bit patterns.</p> <p>I can recall how binary is used to represent numbers up to 255. I can recall that computers use binary mathematically to calculate data. I can carry out binary addition.</p>
<b>Lesson 5</b>	<b>Using binary - text</b>
	<p>To represent binary as text.</p> <p>I can recall that binary is the main means of all data transfer. I can identify that data transfer needs a common language. I can use binary to create a written message.</p>
<b>Vocabulary</b>	
data, data transmission, discovery, Mars Rover, signal, 8-bit binary, binary code, data transmission, numerical data, radio signal, sequence, byte, CPU, input, output, RAM, simulation, binary numbers	

<b>Year 5</b> <b>Computing</b> <b>Spring 2</b> <b>Programming 2: Micro:bit</b>	
<b>Previous learning</b>	
<p>Before starting this unit you might want to check children can recall:</p> <p>What is coding? (Using a set of instructions for a computer to understand.)  What are programming blocks? (The part of the coding platform which give the instructions.)  Why are the blocks colour coded? (They all belong in the same category as they all have similar attributes.)  What is the process called to fix an error in a code? (Debugging.)</p>	
<b>Substantive Knowledge in Computing</b>	<b>Disciplinary knowledge in Computing</b>
By the end of KS2, children will know how different technology is used in our lives; they will have developed knowledge of Digital Literacy; they will understand the basic principles of programming and coding and they will know how to stay safe using the internet.	Our Computing curriculum will equip children not only with the skills and knowledge to learn and grow in the digital world we live in, but more importantly in a safe and secure manner. They will be able to apply the British Values of democracy, tolerance, mutual respect, rule of law and liberty when using digital systems.
<b>Lesson 1</b>	<b>Tinkering with BBC Micro:bit</b>
	<p>To tinker with a new piece of software.</p> <p>I can predict what I think something new will do. I can explore something independently. I can explain what I found.</p>
<b>Lesson 2</b>	<b>Programming an animation</b>
	<p>To program an animation.</p> <p>I can decompose an animation into a series of images. I can explain the difference between 'on start' and 'forever' blocks. I can choose the blocks I need for my program.</p>
<b>Lesson 3</b>	<b>Polling program</b>
	<p>To recognise coding structures.</p> <p>I can identify some code blocks. I can predict what a block or program does.</p>

	I can explain how and why a program works.
<b>Lesson 4</b>	<b>Programming a pedometer</b>
	To create a program for a specific task.  I can recognise code blocks. I can decompose a program. I can debug a program.
<b>Lesson 5</b>	<b>Programming a scoreboard</b>
	To create a program.  I can decompose a program. I can write an algorithm. I can debug a program.
<b>Vocabulary</b>	
Algorithm, Animation, App, Blocks, Bluetooth, Code block, Connection, Debug, Decompose, Designing, Desktop, Device Download, Input, Instructions, Load, Loop, Micro:bit, Outputs, Pairing, Pedometer, Polling, Program, Repetition, Reset, Sabotage, Systematic, Tinkering, USB, Variables, Wifi, Wireless	

<b>Year 5 Computing Summer 1 Creating media: Stop motion animation</b>	
<b>Previous learning</b>	
N/A	
<b>Substantive Knowledge in Computing</b>	<b>Disciplinary knowledge in Computing</b>
By the end of KS2, children will know how different technology is used in our lives; they will have developed knowledge of Digital Literacy; they will understand the basic principles of programming and coding and they will know how to stay safe using the internet.	Our Computing curriculum will equip children not only with the skills and knowledge to learn and grow in the digital world we live in, but more importantly in a safe and secure manner. They will be able to apply the British Values of democracy, tolerance, mutual respect, rule of law and liberty when using digital systems.
<b>Lesson 1</b>	<b>Animation explored</b>
	To understand what animation is  I understand and can explain what 'animation' means I can explain the history of animation I can create my own 19th century animation toy
<b>Lesson 2</b>	<b>Exploring stop motion</b>
	To understand what stop motion animation is  I understand and can explain what 'stop motion' means I understand how to create a short animation I understand what onion skinning is I can make small changes to my object to make my animation smoother
<b>Lesson 3</b>	<b>Planning my stop motion project</b>
	To plan my stop motion video, thinking about the characters I want to use  I can work collaboratively with others to plan a storyboard for an animation

	<p>I can keep my animation idea simple</p> <p>I can design and create a character that can be used in my animation</p> <p>I can decompose my story into smaller parts</p>
<b>Lesson 4</b>	<b>Stop motion creation</b>
	<p>To create a stop motion animation</p> <p>I can create a simple animation following my storyboard plan</p> <p>I can change my plan to recognise when something is too difficult to animate</p> <p>I understand the importance of keeping the camera still and making small movements between shots</p>
<b>Lesson 5</b>	<b>Editing my stop motion project</b>
	<p>To edit and assess my stop motion animation</p> <p>I can make small changes to my models to make my animation smoother</p> <p>I can delete frames</p> <p>I can assess my animation</p>
<b>Vocabulary</b>	
<p>Animation, Animator, Background, Character, Decomposition, Design, Digital device, Edit, Evaluate, Flip book, Fluid movement, Frames, Model, Moving images, Onion skinning, Still images, Stop motion, Storyboard, Thaumatrope, Zoetrope</p>	

<p><b>Year 5</b>  <b>Computing</b>  <b>Summer 2</b>  <b>Skills showcase: Mars Rover 2</b></p>	
<b>Previous learning</b>	
<p>Before starting this unit, you might want to check that the children can recall:</p> <p>Data transmission is the movement of data from one point to another.  The Mars rover is a robotic vehicle that explores, investigates and returns data about the terrain on Mars.  Binary is the basic form of communication between computers, including the Mars rover.  ASCII (American Standard Code for Information Interchange) uses binary codes to represent other characters, such as numbers and letters.  A computer's RAM (Random Access Memory) stores the instructions while a program is running.  A computer's CPU (Central Processing Unit) is the 'brain' of a computer. It handles data from input and output devices and the programs running on the computer.</p>	
<b>Substantive Knowledge in Computing</b>	<b>Disciplinary knowledge in Computing</b>
<p>By the end of KS2, children will know how different technology is used in our lives; they will have developed knowledge of Digital Literacy; they will understand the basic principles of programming and coding and they will know how to stay safe using the internet.</p>	<p>Our Computing curriculum will equip children not only with the skills and knowledge to learn and grow in the digital world we live in, but more importantly in a safe and secure manner. They will be able to apply the British Values of democracy, tolerance, mutual respect, rule of law and liberty when using digital systems.</p>
<b>Lesson 1</b>	<b>Pixels</b>
	<p>To recognise how bit patterns represent images as pixels.</p> <p>I can recall how computers transfer data in binary.</p> <p>I can relate 8-bit binary to 256 possibilities.</p> <p>I can identify that a pixel is the smallest possible element of a digital image.</p> <p>I can explain how a series of pixels are used to encode an image.</p>
<b>Lesson 2</b>	<b>Compressing images</b>

	<p>To explain how the data for digital images can be compressed.</p> <p>I recall that images are made of pixels.  I can relate the number of pixels to the size of an image.  I can explain one of the methods of JPEG compression.  I can explain how to reduce the file-size of a digital image.</p>
<b>Lesson 3</b>	<b>Fetch, decode, execute</b>
	<p>To identify and explain the fetch, decode, execute cycle.</p> <p>I understand the difference between ROM and RAM.  I know what fetch, decode and execute look like in different contexts and examples.  I can explain the fetch, decode, execute cycle.</p>
<b>Lesson 4</b>	<b>Tinkering with CAD</b>
	<p>To create a safe online profile and tinker with 3D design software.</p> <p>I can choose a safe and suitable username and password.  I understand the importance of keeping personal information safe.  I can begin to use 3D design software.</p>
<b>Lesson 5</b>	<b>TinkerCAD tutorials</b>
	<p>To modify the design of a 3D object using CAD software.</p> <p>I can undertake independent online tutorial-based learning.  I can name my object.  I can share my object to an online community.  I can discuss how to use an online community responsibly.</p>
<b>Vocabulary</b>	
3D, Algorithm, Binary image, CAD, Compression, CPU, Data, Drag and drop, Fetch, decode, execute, ID card, Input, JPEG, Memory, Online community, Operating system, Output, Pixels, RAM, Responsible, RGB, ROM
